PROFILE

Innovative Information Systems undergraduate at Telkom University (GPA 3.68/4.00) specializing in Full-Stack Web Development, AI Engineering, and Cloud Computing. Experienced in designing scalable backend architectures, training deep learning models, and shipping production marketplace applications. Backed by 3 professional AI certifications from Google, IBM, and Microsoft, with a proven track record of delivering 3+ end-to-end products, securing 40+ corporate sponsors, and reaching national finalist stages in 2 hackathons within the past 6 months.

EDUCATION

Telkom University | Bachelor of Information Systems

August 2023 – Present

- Current GPA: 3.68/4.00 (top 15% of cohort).
- Relevant Coursework: Enterprise Resource Planning (ERP), Web Development, System Analysis and Design, Database Management.
- Involvements: Active Member of GDGoC Machine Learning Study Group across 12+ weekly sessions (exploring Python, TensorFlow, and computer vision implementation).

TECHNICAL SKILLS & COMPETENCIES

- Full-Stack Web Development: React, Next.js, Node.js, NestJS, Express.js, PHP, Laravel, PostgreSQL, Prisma, RESTful APIs, Docker, Git/GitHub.
- Artificial Intelligence & ML: Python, TensorFlow / PyTorch, Scikit-Learn, OpenCV, YOLO.
- LLM Application Development: OpenAI API, LangChain, Retrieval-Augmented Generation (RAG), Prompt Engineering.
- Enterprise Systems: Enterprise Resource Planning, Odoo, SAP.
- Data Science & Analytics: Pandas, NumPy, SQL, Matplotlib, Jupyter Notebook.
- Tools & Workflow: Figma, Postman, Linux, CI/CD, Agile/Scrum, Playwright E2E Testing.

WORK EXPERIENCE

Artificial Intelligence Engineer | HUMIC Engineering Research Center (Internship)

April 2026 – Present

- Selected as 1 of 4 division members for the Computer Vision track at HUMIC Research Center, focusing on AI-based image processing and deep learning across an 8-week structured research program.
- Conducted Systematic Literature Review (SLR) across IEEE, Scopus, and Google Scholar databases, analyzing 10+ peer-reviewed papers and synthesizing research gaps into a structured taxonomy.
- Designing and training deep learning models for mammography image classification using the INbreast, MIAS, and DDSM datasets, applying preprocessing and augmentation pipelines on 7,000+ medical images.
- Evaluating model performance using accuracy, F1 score, and confusion matrix, producing visualizations of model behavior across 5+ experimental iterations.
- Building end-to-end experiment pipelines with Python, PyTorch, TensorFlow, OpenCV, and Jupyter Notebook, and delivering weekly progress reports across 9 sprint cycles.

Full-Stack Developer | Central Computer Improvement (CCI) Telkom University

February 2026 – Present

- Member of the Research & Development division, contributing across 2 concurrent projects with a 4-person engineering team using Git/GitHub for version control and continuous code integration.
- **Vendor Marketplace (Backend Developer):** Built backend systems for a vendor marketplace web platform in collaboration with UKM CSC, using NestJS, PostgreSQL, and Prisma ORM. Designed 10+ RESTful endpoints and database schemas supporting vendor onboarding, cross-sponsorship, and secure user transactions.
- **Proposal & LPJ Generator for Ditmawa (Full-Stack Developer):** Independently developed an internal tool for Telkom University's student directorate that enables 50+ student organizations to generate official Proposal Kegiatan and LPJ documents automatically. Handled end-to-end development including UI/UX design, PDF rendering with dompdf, multi-page layout handling, and document formatting, delivered under a 3-day self-imposed sprint with no predefined spec, replacing a manual workflow that previously took 2+ hours per document

EXPERIENCE

Staff of Competition Division | ERP Laboratory Telkom University

March 2026 – Present

- Lead the Champions Teams work program, an initiative aimed at increasing competitive participation among 200+ Information Systems students through curated competition opportunities.
- Research, curate, and disseminate 10+ national and international competitions every month across Essay, Business Model Canvas, Design, IT, and Business Plan categories.
- Lead weekly brainstorming sessions with the division team, manage community engagement groups, and distribute competition information strategically through the laboratory's social media channels, reaching 1,000+ student followers.
- Facilitate laboratory operations and support the preparation of 5+ technical events and internal workshops throughout the semester.

- Sponsorship of Competition Squad | Telkom University National Futsal Championship**

December 2025 – Present

 - Served as part of the Sponsorship Division for TUNFC 2026, a national-level futsal event hosting 35+ participating teams from universities across Indonesia.
 - Identified and approached 40+ potential corporate sponsors through targeted B2B outreach, conducting 15+ pitching sessions to companies and negotiating partnership agreements covering branding placements and event activation.
 - Established partnership agreements with multiple tenants and managed tenant coordination throughout the event, contributing to a 100% sponsorship slot fulfilment rate ahead of competition day.

PROJECTS

- GAP – API Intelligence Platform | Personal Project**

May 2026 – Present

 - Developing GAP, an API intelligence platform built with TypeScript that auto-detects routes, request bodies, and backend-to-frontend contract mismatches directly from source code, leveraging Retrieval-Augmented Generation (RAG) and Regular Expressions, with zero annotations and zero manual documentation required.
 - Designed the core engine that parses entire codebases and generates a full API map in seconds, targeting engineering teams who struggle with undocumented or out-of-sync APIs across services.
 - In active development with open feedback loops from peer engineering teams.

- Vendor Marketplace | Central Computer Improvement Telkom University**

February 2026 – Present

 - Building a social commerce platform based on posts, designed as a one-stop marketplace to meet the various needs of the campus ecosystem and targeting Gen Z users from SMEs, students, student organizations, and campus communities.
 - Implemented multi-category vendor verification flows managed by CSC, supporting structured onboarding for 5+ vendor categories.
 - Architected a cross-sponsorship mechanism allowing SMEs and vendors to sponsor each other, share audiences, and build credibility together, creating a network effect across the platform.

- Proposal & LPJ Generator for DITMAWA | Telkom University Student Directorate**

April 2026 – Present

 - Internal tool for Telkom University’s student directorate enabling UKMs and student organizations to generate official Proposal Kegiatan and LPJ documents without the chaos of manual formatting.
 - Delivered under a 3-day self-imposed sprint with full creative freedom and no predefined specification, with every design decision, feature, and UI flow owned end-to-end from scratch.
 - Solved complex PDF rendering with dompdf including multi-page layouts, embedded tables, signatures, logos, and pixel-accurate formatting, replacing a previously manual process used across 50+ campus organizations.

HONORS & AWARDS

- Finalist, Best UX & Design Category**

May 2026

Refactory Hackathon 2026 | Refactory
 - Reached the finalist stage of Refactory Hackathon 2026, a national-level competition, recognized in the Best UX & Design category for delivering a strong user experience and design solution against participants from universities nationwide.

- Finalist, Best Innovation Team Category**

April 2026

Hackfest 2026 | Universitas Ciputra
 - Reached the finalist stage of Hackfest 2026, a national-level hackathon hosted by Universitas Ciputra, competing as part of the Best Innovation Team category against participants from universities across Indonesia.

CERTIFICATIONS

- Google AI Professional Certificate | Google
Issued: March 2026 | Credential ID: [WZVZJWMHBSNY](#)
- IBM AI Developer Professional Certificate | IBM
Issued: March 2026 | Credential ID: [QT3HO3K513XT](#)
- Microsoft Certified: Azure AI Fundamentals | Microsoft
Issued: September 2025 | Credential: [Credly](#)
